To Whom It May Concern,

I am writing to you today, to briefly introduce myself and demonstrate my capabilities and achievements within the ever growing and demanding sector of Computer Science. I earned my bachelor's degree in Computer Science (Minor) Mathematics at Queens College early this year.

My course has focused on a variety of specialist tools such as Algorithm Analysis, Software Engineering, Database Systems and Web Development. These have assisted me in broadening my knowledge while showing me the diverse side of Computer Science that I find fascinating.

I have gained further experience aside from my studies, through my personal projects as socialgeeking.com. The time spent building my projects opened my eyes further to the creative challenges required in the industry and how it is forever evolving. This job solidified my beliefs in choosing this career path for myself. I am fanatical about precision and order, enjoy problem solving and the challenges it brings with it and believe in team efforts. I hope that you will give me the chance to interview for the available position as soon as possible. Looking forward to hearing from you.

Kind regards,

Ruslan Temirkhanov
